

[[TEMPERANCE/TEETOTALISM]]

Twenty-one double-sided leaves of a manuscript temperance lecture, unsigned/undated ca 1835, stitched. New England : ca 1830. 42pp. A plea from unknown author for total abstinence, offering statistics, history and warnings of the dangers of a half-way approach to temperance. They refer to Reuben Mussey, Professor at Dartmouth College (Mussey left Dartmouth in 1838). Also references the 'recent establishment of the Congressional Temperance Society' formed in 1833.

My friends, while other nations have been visited by the great scourges of war pestilence and famine, while the iron rod of tyranny has been extended over them and ignorance and superstition have swayed their dark dominion over the minds · while this combination of circumstances has caused vice, wretchedness, and moral degradation to prevail there · we have reason to rejoice that our country has been comparatively spared from those desolating scourges

Very good. Stitched letters . \$200.00

[[FLORIDIANA]][GARDEN DESIGN}. ca 1930 **Eight Original Photographs of Bok (Singing) Tower, Lakes Wales, Florida - Carillon, Palm Trees, Grounds and Flamingos.** Central Florida : ca 1930. The gardens began in 1921 when Dutch immigrant, Edward W. Bok, editor of the popular women's magazine Ladies Home Journal and his wife, Mary Louise Curtis Bok, who would found the Curtis Institute of Music in Philadelphia in 1924, were spending the winter beside Florida's Lake Wales Ridge and decided to create a bird sanctuary on its highest hill (298 feet above sea level, 91 meters).

Bok commissioned noted landscape architect Frederick Law Olmsted, Jr. to transform what then was an arid sandhill into "a spot of beauty second to none in the country". The first year was spent digging trenches and laying pipes for irrigation, after which soil was brought to the site by thousands of truck loads and plantings began. The Olmsted plan included the planting of 1,000 large live oaks, 10,000 azaleas, 100 sabal palms, 300 magnolias, and

500 gordonias, as well as hundreds of fruit shrubs such as blueberry and holly.

Attempts were made to introduce flamingos to the sanctuary several times, which is why early renderings of the tower show flamingos at the reflection pool rather than swans. These early efforts were unsuccessful, however, as the flamingos were not native to central Florida and could not survive the winters that were cooler than those of southern Florida, where they may be found. Fine. Eight 2-7/8" x 4-1/2" b/w photographs. **\$70.00**

[[COAL]] Credit: Michael Sullivan . 1971 **Original Photograph, Coal Yard in Hinton, West Virginia.** West Virginia : 1971. Deep, inky tones with foreground of tracks, mud and puddles reflecting geometric sky and metal forms. Smokestack and plume in background. Very good.

Photograph . **\$40.00**
